Introducing

EMS 1004

by **Health Technology**

The ***EMS 1004*** is a state-of-the-art Electric Muscle Stimulation devicemanufactured by **Health Technology**, This advanced device delivers five therapeutic currents:

1- Faradic Current
Frequency: (50, 70, 100) Hz - Band Width: 600 µ sec.

2- Low TENS
Frequency: (1,3,5,10, 20) Hz - Band Width: 200 µ sec.

3- High TENS
Frequency: (50, 70, 100, 130) Hz - Band Width: 100 µ sec.

4- Modulation TENS
Frequency: (10:150) Hz - step 10 Hz
Band Width: (50:500) µ sec. - step 10 µ sec.

5- Burst TENS
Frequency: (0.5:5) Hz
Band Width: (50:500) µ sec. - step 10 µ sec.

providing **versatile treatment options for pain management & muscle rehabilitation.**

What is EMS?

Electric Muscle Stimulation (EMS) therapy is a cutting-edge therapeutic technique that uses controlled electrical impulses to stimulate muscle contractions, promoting muscle rehabilitation, pain relief, and improved circulation. EMS is widely used in physiotherapy,
sports medicine, and recovery programs to enhance muscle strength, reduce atrophy, and accelerate healing. It is an effective non-invasive treatment for various musculoskeletal conditions, offering both therapeutic and preventive benefits.

EMS 1004

EMS 1004

We are enhancing your Therapy toolkit with a new, included en Electrode, This recision accessory allows for targeted Stimulation of small muscle groups, trigger points, and delicate areas, offering superior control and treatment versatility for even more effective outcomes - all provided at no increase to the device's price.

Certified and registered by the Egyptian Drug Authority (EDA),the ***EMS 1004*** meets the highest standards of safety and efficacy. With its competitive pricing, it stands as the ideal choice for physiotherapy centers, sports clinics, and healthcare professionals across Egypt.

Key Applications of EMS 1004

- Pain Relief - Effective for chronic and acute pain management (back pain, arthritis, neuropathy).
- Muscle Rehabilitation - Prevents atrophy, enhances muscle strength, and accelerates recovery post-injury or surgery.
- Sports Medicine - Improves performance, reduces muscle fatigue, and speeds up recovery for athletes.
- Circulation Enhancement - Stimulates blood flow, reducing swelling and promoting healing.
- Neuromuscular Re-education - Helps restore muscle function in neurological conditions.

by Health Technology SINCE 2008

Why Choose EMS 1004?

- 5 Therapeutic Currents – Versatile treatment options for diverse conditions.
- 4-Channel System – Enables multi-zone treatment for better efficiency.
- Certified & Registered – Approved by Cairo University & the Egyptian Ministry of Health.
- Competitive Pricing – High-quality performance at an affordable cost.
- Built-in Power Cable & Compatible Electrodes – Ready to use with no additional hassles.
- The precise, focused stimulation of Pen Electrode to treat small muscle groups, trigger points.

Unmatched After-Sales Support

- Continuous Availability of Spare Parts – Ensuring long-term device reliability.
- Professional Maintenance Support – Expert technical assistance whenever needed.

Upgrade your clinic with **EMS 1004**
